"THE MOST EXCITING WAY TO PLAY SINGLE DECK"

PROCEDURES

The game is played with one normal deck containing 52 cards. All the players' cards are dealt face up and the dealer's cards are dealt in the normal manner. The players' cards **are** dealt face up to enhance the fun of the game and allow the dealer to point out the many exciting options and bonuses.

The player may double down (only for the full amount of original **wager**) on two or more cards, totaling 21 or less, even after splitting and hitting (including aces). The player may also double down on any ten valued card **and** an ace (including blackjack); in which event the ace is counted as a total of one. The player receives only one card on any double down (no hitting after doubling).

The player may split (for the full amount of original wager) all equal valued cards, including aces, three times (making up to four hands). The player may hit on **split aces** the same as **any** equal valued cards.

The player may surrender **one half** of the bet on two or more unbusted cards, even after hitting, doubling or splitting. Each bet on a split is considered one **bet**. The player surrenders one of the two double down bets. (Surrender is allowed only after the dealer checks for blackjack.)

The player will instantly win even money on any hand containing 6 cards totaling 20 or less (even after splitting). After paying the player, take the cards and place them into the discard holder. (No instant winners or bonuses on double down hands.) If a player has a soft total of 20 or less in 5 cards, tell that player if **he/she** hits **he/she** will have a guaranteed 6 card winner and could even make a 2-to-1 winner if **he/she makes** exactly 21.

The player will instantly win 2-to-1 with 5 or 6 cards totaling 21 (even after splitting). After paying the player, take the cards and place them into the discard holder. If the player has a 4 card total of 11, suggest that **he/she** hits instead of doubling because the player will win 2-to-1 if **he/she** catches a ten value card. (No instant winners or bonuses on double down **hands.**)

All players' blackjacks are paid 1-to-1 (even money) with the exception of any all diamond blackjacks that are paid 2-to-1. All players' blackjacks are paid instantly (unless **he/she** places an insurance bet) before any other play, even if the dealer may also have a blackjack. The player may place an insurance bet, even if **he/she** has a blackjack. The insurance bet is always a separate side bet, paying 2-to-1. (The player does not get even money, when insuring with a blackjack, because **he/she** wins either even money or 2-to-1 instantly without an insurance bet.)

These are the usual questions and comments. New players will think this is new because they will read the sign explaining that this an exciting and fun way to play single deck and they will see the **players'** cards being dealt face up. With the following explanations, new players will sit down and have **fun**, realizing that SUPER **FUN** 21 is simply single deck blackjack with the most exciting options ever offered.
